

LINX SL3 LASER CODER

Our SL3 laser coder is ideal for printing complex codes, 1D, 2D and logos

- Affordable**
- Robust**
- Simple**

Affordable

Compact, single unit coder

Lower cost than multi box design lasers without the need to compromise on quality

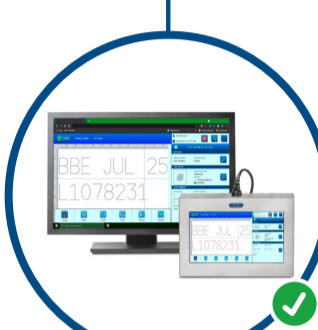

Operates without consumables

No need to store fluids, labels, ribbons or other consumables

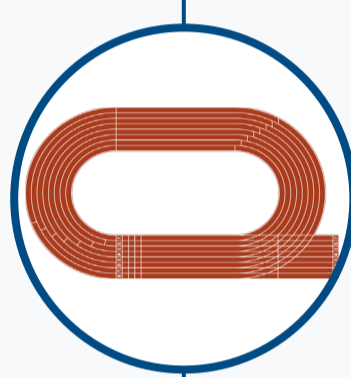

Flexible user interface

Optional LinxVision® touch screen or free LinxVision® software on any browser-enabled device under Windows®

Robust

Maximum marking speed 360m/min

30W CO2 Laser

IP54 stainless steel and anodised aluminium enclosure

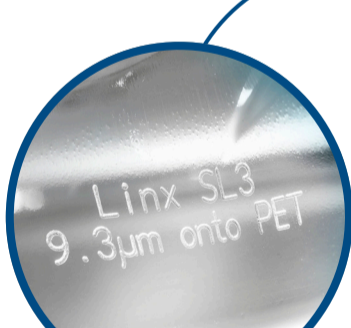

Established and proven laser tube and marking head technology

Operates without interconnections improving laser reliability

through eliminating possibilities of interconnection failure or damage

Clear, readable codes with long-lasting adhesion

Simple

Multiple mounting positions and orientations

3 mounting sides versus 1 or 2 offered by competitors giving you additional installation flexibility

Single unit installation

to reduce production line space usage and minimise installation and operator training time

Quick and easy maintenance

no wear parts to increase production time and reduce running costs
