

LINX PRINTERNET™

Monitor

- ✓ View the **status of your printers** - Remotely check which machines are printing, and quickly see if they need attention. Always know the status of your coding and marking
- ✓ View the **status of current job** printing - view the message being printed and the print counter
- ✓ **Measure progress** of the job against custom KPIs
- ✓ **Manage the messages** available on your printer and view message history

Maintain

- ✓ View on-screen **printer warnings** on your mobile device or PC without having to visit the production floor
- ✓ Receive **real-time email notifications** and alerts - you choose who receives which alerts
- ✓ **Monitor printer health** and view when maintenance service is due. View fluid status and be alerted when refills are due
- ✓ Keep a **master copy** of approved messages in the PrinterNet™ message store, to quickly recover from unapproved changes

Support

- ✓ **Monitor your printer performance**, alert you to any issues and advise on preventative maintenance
- ✓ Assist with **creating and editing messages**
- ✓ **Remotely upgrade** printer software
- ✓ **Use printer data to diagnose problems** - Technical Support network can connect to fix your printer or provide diagnostics prior to service engineer visit

See the status of your coding and marking anytime, anywhere with Linx PrinterNet™

Linx PrinterNet™ is a cloud-based application which enables you to use printer information to see the status of your jobs, check your printers' health, and remotely control them whenever you need to, keeping you connected to your line and enabling you to perform coding operations more efficiently.

With the Linx Technical Support network also monitoring your printers, Linx PrinterNet™ helps us to keep your printers running smoothly.

LINX

Linx PrinterNet™

Available for 8900 series, 8800 series and Linx 10 printers

Feature Highlights

MONITOR YOUR LINE AND JOB

Linx PrinterNet™ enables you to remotely check which machines are printing and what messages are being printed, so you always know the status of your coding.

Do you want to know the status of your line printers when you are away from the production floor?

Linx PrinterNet™ allows you to see the status of all your Linx printers from any device, anytime, anywhere.

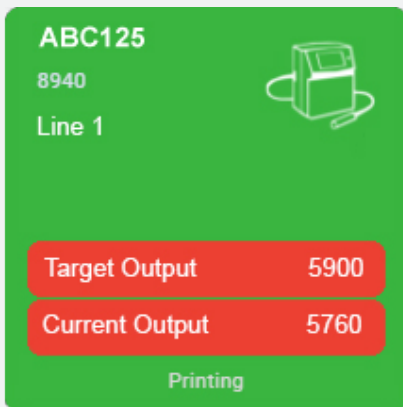

PrinterNet™ dashboard

Do you need to check the current message being printed?

Linx PrinterNet™ allows you to view the current message being printed, so you always know what the machine is coding and if it is correct.

Do you need to predict when a job is due to finish?

Linx PrinterNet™ allows you to view the current print count, enabling you to predict when a job is due to end and better plan changeovers. Set your own KPI's into PrinterNet™ and monitor your production against your targets. View current progress of your target print rates or target end times.

KPI monitoring

Do you want to view a summary of your production lines performance?

Linx PrinterNet™ can show you a summary of your production line performance using data collected from the connected Linx printers.

The insight generated includes: Production line running times and durations, Number and duration of any line downtime events (89XX printers only), Printer consumables usage, Numbers of products processed and Production performance against target rates (if KPIs are enabled on the printer)

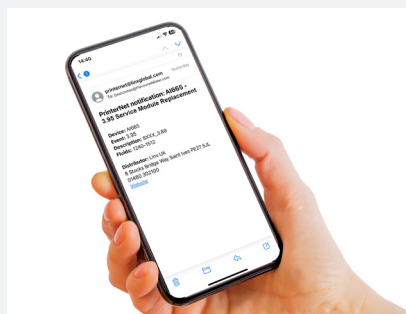

Production Line Insights

MAINTAIN UPTIME AND CONTROL

Linx PrinterNet™ provides a simple, at-a-glance status of each of your Linx printers to monitor your printers health, including real time alerts of any printers needing attention, warnings and secure storage of settings, helping you to maintain your printer and maximum efficiency.

Do you ever see warnings on your printer and are not sure what to do?

Linx PrinterNet™ can alert you or your technical team by email, so that you can prevent potential problems before they arise.

PrinterNet™ email alert

Do you ever run out of ink or solvent for your printer?

Linx PrinterNet™ can alert you when you are running low of fluids in a printer so you can be prepared to refill, eliminating downtime.

Printer Summary screen

Do you want to know when someone changes a printer message?

Linx PrinterNet™ can alert you to a user logging into the printer, so you can check the change is expected

Do you want to be able to back up your machines?

Linx PrinterNet™ can store your printer settings and messages securely in the cloud, enabling you to quickly restore your machine.

LINX SUPPORT

Linx PrinterNet™ provides you with a more proactive support service by allowing our Technical Support network to check your printer's performance and alert you to any issues.

Does your team ever need help setting up or changing messages?

Start printing quickly as our Technical Support network can assist with message setup.

Do you have limited time available to let an engineer work onsite?

Linx PrinterNet™ allows our Technical Support network to quickly diagnose printer issues before a service engineer is sent to site. With remote printer data, we may even be able to fix the issue over the phone.

Do you ever worry that you might not be using the printer in the best way?

Our Technical Support network can monitor your printer's health, advise you how to run it more efficiently, and identify any preventative maintenance you may need to carry out.

Do you want immediate access to new software updates?

Always have access to the latest printer and security features with remote software upgrades. With no need for an engineer visit, you can decide when to run the upgrade, for the least disruption to your line.
